

Basel, Switzerland. – December the 12th 2007 – Solfit's got a bit older as we turned ten this year and we sure are looking forward to being teenagers !!! [again]. Back in 1997, when Jasbir Singh and Remo Stebler founded Solfit, we were a UNIX shop doing pretty much pure system management work. Today we are more mature and more diversified, having deepened and spread our expertise to new and interesting areas. These in a nutshell, include:

System and Application Development, Integration and Management:

- For heterogeneous UNIX/Linux and Microsoft worlds
- Using AD, Exchange, Sharepoint & LDAP, NIS+, Samba etc.
- Using Oracle, Sybase, MS SQL Server, MySQL etc.
- Using Tomcat, Weblogic, WebSphere, Oracle AS, IIS etc.
- Using JAVA, .NET, WebServices, C#, C++ and [still some good old] 'c'.
- Using strong Search/Authentication and the latest Security methods and tools.

Document Management:

- Developed over 10 large applications being used every day by big Pharma.
- Integrated, Migrated and Manage EDMS systems at 8 large enterprises.
- Developed Monitoring and Stress test solutions being used in the above.

Identity Management:

- Accredited SSO solutions for Documentum for DFC/WDK and DFS [5.2-6.0] being used every day by many large companies all over the globe.
- SSO projects using AD & Kerberos for UNIX [PuTTY, FTP, SSH], SAP [SAP-GUI and NetWeaver], Sybase and Oracle at numerous customers.

Yes, a lot has changed, but then again not really. Our name Solfit, 'Solutions for IT', still is the driving force for us: we believe that no IT problem is unsolvable; it's a question of experience and of being pragmatic. We have increased our customer base from 2 to over 20 global corporations. We've partnered with Documentum, Oracle, Microsoft, SUN, Endeca, and Centrify. We have not lost a single customer on the way [apart from merger related ones] and 70% of our employees have been with us for over 7 years.

As a private company, profitability and stability, not growth, are what drives us. We are more interested in having a stable group of motivated engineers that form the core Solfit team and then let our customer benefit from the team's know-how and experience. Seeing that we are 10 years old and having been consistently profitable, we must be doing something right.

We would like to thank our customers and partners for their interaction and trust, without this we would not be here. We would also like to thank our wonderful and colorful group of engineers, who as individuals do not always have all the answers, but as a team they have always provided a [Solfit] solution; it's all about teamwork.

###

About Solfit

Solfit, Solutions for IT AG, based in Basel, Switzerland and founded in 1997 provides integration, document management and identity management services. With expertise that includes development, migration, integration, SSO and monitoring tools for Documentum, Oracle, Sybase, UNIX and others, Solfit's consulting services span all phases of IT projects, from problem analysis through solution integration and development to post-installation support. Solfit customers include pharmaceutical, finance and chemical industry enterprises such as Novartis, UBS and Syngenta. More information is available at www.solfit.ch.
